

## Media Data Sheet

### GUYSON FLEXBEAD

**GUYSON FLEXBEAD** is an iron powder with low content of oxides produced by water atomization, annealing and final sieving. It is characterized by its coarse size with shape and size distribution suited to light abrasion purposes.

The low level of oxides brings a very soft blasting effect.

**Typical Applications:** Cleaning and reconditioning without dimensional change (i.e. mold and die cleaning); carbon and light corrosion removal.

**Appearance/Color:** The shape of **GUYSON FLEXBEAD** is slightly irregular, globular, with a smooth surface. Powder color grade on light grey suits most demanding product color restrictions.

**\*MSDS SHEETS ARE AVAILABLE ON REQUEST\***

<b>Apparent Density</b>	Not less than 3.5g/cm <sup>3</sup>
<b>Hardness</b>	286-354 HV (28 – 36 HRC)
<b>Particle upper cut size (typical)</b>	300 to 500 microns
<b>Package size</b>	55 lbs.
