

Glassbead

Premium Soda-Lime Glass Blast Media

Guyson Glass Bead is a premium soda-lime glass media engineered for cleaning, cosmetic finishing, and light peening applications. Its smooth spherical shape produces a uniform satin finish while cleaning surfaces without significantly altering dimensions or contaminating the substrate. Chemically inert and iron-free, Glass Bead is ideal for precision components requiring a clean, attractive surface finish.

Why customers choose Glassbead?

- Produces uniform satin and matte finishes
- Cleans without dimensional change
- Chemically inert and iron-free
- Non-contaminating blasting media
- Excellent for cosmetic finishing
- Consistent surface appearance
- Suitable for delicate and precision components

Typical Applications

- Cosmetic surface finishing
- Cleaning precision components
- Mold and die cleaning
- Light deburring
- Descaling
- Surface conditioning
- Low-intensity shot peening
- Automotive restoration
- Blending machining marks
- Pre-anodizing surface preparation

Supply Options

- 50lb bags/ pallet
- Blanket order programs available

Specifications

Property	Value
Appearance	Clear/White
Media Shape	Round & Spherical
Density	0.80 g/cm ³
Hardness	544-820 HV

Product Image

Ideal Industries

- Aerospace
- Medical Manufacturing
- Firearms Manufacturing
- Automotive Restoration
- Precision Machining
- Metal Fabrication
- Tool & Die
- General Manufacturing
