

WHERE QUALITY COMES TO THE SURFACE

Media Data Sheet

GUYSON METALBEAD

GUYSON METALBEAD is a soft iron spherical media and is produced after sieving and mechanical treatments following atomization of molten iron.

It can be used in centrifugal wheel-type as well as suction-blast and pressure-blast cabinets.

Typical Applications (without dimensional changes to components): Removing heat treat scale from components and sintered powder metal parts; cleaning of extrusion dies; cleaning of glass molds; cleaning of tire molds; de-flashing of delicate components; removing corrosion from machined surfaces

Appearance/Color: **GUYSON METALBEAD** is gray/black metallic and very symmetrical and spherical.

MSDS SHEETS ARE AVAILABLE ON REQUEST

Apparent Density	7.4 kg
Hardness	412- 484 HV (42.7 to 47.7 HRC) (as operating mixture 46.1-50.5 HRC)
Particle size	100 to 200 microns
Package size	55 lbs.

Prices are subject to change. Contact your Guyson Corporation of U.S.A. Customer Service Representative for current pricing and availability at **800-633-6677** or **518-587-7894**, or e-mail us at **custsvc@guyson.com**
