

Media Data Sheet

SILICON CARBIDE

Silicon Carbide is an ultra-hard sharp fasting cutting media. It has a high resistance to breakdown and an extended service life.

Typical Applications: Etching; surface preparation for thermal spray coatings; precision roughening of brake rotors, turbine blades and plastic components. Silicon Carbide creates a dull matte finish.

Appearance/Color: **Silicon Carbide** is black in color and granular in shape. It is high in purity, corrosion resistant and wear resistant.

Size Range	16-240 Grit
Hardness range	2035 HV (>70 HRC)
Apparent Density	>3.21 g/cc
Package size	55 lbs.
