

Media Data Sheet

TYPE II PLASTIC GRIT (UREA)

Type II Plastic Grit is somewhat harder and more durable than Type I. This angular grit is slightly more aggressive in stripping coatings without peening or roughening the substrate. (Type II Plastic Grit is available with MIL SPEC MIL-P-858991A certification.)

Typical Applications: Rust removal; light de-flashing; removal of paint, anti-corrosions coatings and thin metals such as aircraft aluminum and automotive restorations.

Appearance/Color: Type II Plastic Grit is coarse and angular in shape, and is multi-colored.

Hardness range	229 HV (3.5 MOH)
Apparent Density	1.50 g/cm ³
Package size	50 lbs.

Available Sizes
12/16 (Extra Coarse)
16/20 (Coarse)
20/30 (Medium Coarse)
30/40 (Fine)
40/60 (Extra -Fine)
